

ECS Configuration Change Request

Page 1 of 1 Pages

CCR No. 96-0398	Logged Date 4/17/96	Rev. -	Request Type CCR
Priority Routine <input type="checkbox"/> Urgent <input checked="" type="checkbox"/> Emergency <input type="checkbox"/>	Affected Release		Change Class II
Title (description) Installation of Insure++ in the EDF			
Documents Affected VCATS		Source Nos (RID, NCR, etc.) or Tech Reference	
RTM Change <input type="checkbox"/> Start New Baseline <input type="checkbox"/>			
Problem Since Purify does not run on DEC or IBM and PureCoverage does not run on DEC, IBM or SGI, we have procured Insure++ to perform these functions on these platforms. The manuals have arrived and the software is expected soon. This CCR is being written to prepare for a quick installation. Ask Paula Aiello for the software.			
Proposed Solution Our procurement was to have resulted in a 10 user floating license that can be floated from ONE license manager. Though this is a proprietary manager (not flexlm) it should be established on a reliable machine. It should be able to run on a Sun, in which case it may be best to establish it on our current servers (eos, htsc and neptune). It would seem to make the most sense to automount the software (for DEC, IBM and SGI) in /tools/insure. The ten manuals that have been ordered will be placed in the ECS library. In any event, please let Tom Suhrstedt know the following after the installation, so that he may inform the developers: 1) The automount location 2) Where the license manager is installed. 3) What special environment variables or files need to be established to use the product. 4) The version number of the software (should be at least version 2.1)
